## DETAILED ACTION

### ***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is indefinite because it recites a trademark name, it is noted that the material of an element carrying a trademark name can change with time.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Cupp (U.S. Pat. # 6,766,805).

With regard to claims 1-8, Cupp discloses a hair band (figs. 1-4) comprising a support (11) and a plurality of artificial locks (14) being connectable to the support, wherein at least two locks being different in shape (col. 4, lines 15-17 and fig. 4); at least one of the locks being removably fastened to the support by a non permanent fixing means (17), one of the two locks being fixed to a male band of hook and loop fasteners and the support being integrally provided with at least one female band of the hook and loop fasteners (see fig. 3 and col. 2, lines 61-65); at least two different locks

914) being fastened to the support such as to be simultaneously and also being arranged on opposite sides relative to the midline of the support (see fig. 1).

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Rice (U.S. Pat. # 5,493,735).

With regard to claims 1-8, Rice discloses an auxiliary fitting that can be removably worn by a person (figs. 1-3) comprising a support (13) and a plurality of artificial or natural (col. 4, lines 14-17) locks (35, 37, 39, 41) being connectable to the support, wherein at least two locks being different in size (fig. 3 shows the hair being in different length); at least one of the locks being removably fastened to the support by a non permanent fixing means (47), one of the two locks being fixed to a male band of hook and loop fasteners and the support being integrally provided with at least one female band (49) of the hook and loop fasteners (col. 3, lines 45-54); at least two different locks (35, 37, 39, 41) being fastened to the support such as to be simultaneously and also being arranged on opposite sides relative to the midline of the support (see fig. 1).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Walker, Krasmauskis are cited to show the state of the art with respect to an auxiliary hair fitting.

The drawings filed 5/26/06 have been approved by the Examiner.
